OF WOLLONGONG
AUSTRALIA

Generative AI use:

- You are **NOT** permitted to use Generative AI to complete this assessment.
- You should rely on your memory to complete the quiz. This is good practice for the final exam where there is no access to support resources.

- Additionally, due to the time constraints, you will not have time to consult Generative AI, your notes or use online resources to help you during the quiz. Finally, questions often directly relate to information conveyed in the lectures or textbook. GenAI does not have access to this information and is likely to guess the answer.
- Students are required to uphold academic integrity by submitting their own original work. If there are concerns about the authenticity of a submission, a meeting with the Subject Coordinator will be arranged. This meeting aims to clarify the student's understanding of the assessment task and the assessable concepts, providing an opportunity to address any issues and uphold the principles of academic honesty and fairness in evaluation.

NO EXTENSIONS. If you miss a quiz deadline, you cannot complete that quiz. Instead, you will need to apply for Academic Consideration. If you have an approved Academic Consideration (please approach your lecturer).

Scenario:

You are a team of graduates from Saltwater Point University and have been asked to give Group 51 guidance on how to work as a functional group in future. Drawing on the evidence provided in the case study, you are asked to…

UNIVERSITY
OF WOLLONGONG
AUSTRALIA

Your team should:

- introduce your team and clearly state the purpose of your presentation
- explain how Group 51 functioned as a team,
- identify one significant issue for the group related to managing teams or motivation and justify why this issue is significant,
- analyse this issue using one relevant theory related to managing teams or motivation, and
- provide recommendations for how the team could resolve or mitigate this issue in the future.
- include a reference list in your final slide using UOW Harvard referencing style. In-text citations must also be included throughout the presentation slides wherever theory or sources are used.
- include an acknowledgement of generative AI use (if applicable).

Note: Please read the Subject Outline for full details of assessment II
