

CSIT314 Software Development Methodologies

Lab 2

Task 1:

Download a free UML tool of your choice and install it on your laptop/PC. Some example of free UML tools:

- Modelio <https://www.modelio.org/>
- UML Let <https://www.umlet.com/>

Task 2:

Using a UML tool of your choice for the following exercise

1. Based on the list of **user stories** for the insurance company you completed in Lab 1, develop **use case diagrams** and two **use case descriptions**
2. Use the **b-c-e framework** to develop a design
 - a. Identify **entity** classes and their relationships, attributes and operations.
 - b. Identify **boundary** and **controller** classes (note: one controller class for each use case)
 - d. Draw a **class diagram** to represent your design
 - c. For the two use case descriptions you have done in question (1), draw a **sequence diagram** for each of them.
