School of Computing and Information Technology  
Faculty of Engineering & Information Sciences

**SIM Session 3, 2026**  
**Subject Outline**  
**ECON251 Industry and Trade in Asia**

---

## Subject Organisation

Lecturer/Tutor: Clare Kon

Email: [ckon@uow.edu.au](mailto:ckon@uow.edu.au)

Subject Moderator: Venkata Yanamandram

Credit Points: 6

Duration: June to October 2026, 45 hours of lecture and tutorial

Lecture Times & Location: See schedule as given in SIMconnect and LMS

---

The University uses the eLearning system Moodle to support all coursework subjects.

Students should check the subject's Moodle site regularly as important information, including **details of unavoidable changes in assessment requirements will be posted from time to time** <http://www.uow.edu.au/student/>. Any information posted to the web site is deemed to have been notified to all students.

In extraordinary circumstances the provisions stipulated in this Subject Outline may require amendment after the Subject Outline has been distributed. All students enrolled in the subject must be notified and have the opportunity to provide feedback in relation to the proposed amendment, prior to the amendment being finalised.

Data on student performance and engagement (such as Moodle and University Library usage, task marks, use of SOLS) will be available to the Subject Coordinator to assist in analysing student engagement, and to identify and recommend support to students who may be at risk of failure. If you have questions about the kinds of data the University uses, how we collect it, and how we protect your privacy in the use of this data, please refer to <http://www.uow.edu.au/dvca/bala/analytics/index.html>

## Subject Description

This subject introduces foundational economic concepts and tools to analyze industrialisation in Asia. Utilizing country-specific examples, it examines the transition from inward- to outward-oriented development models. It explores key drivers of regional growth, including Foreign Direct Investment (FDI), its structural implications, and global value chains, while addressing critical domestic challenges. Finally, the subject evaluates the future of Asian economies amidst emerging regional challenges and broader global developments affecting the region.

## Subject Learning Outcomes

On successful completion of this subject, students will be able to:

1. Critically review current literature and relevant magazine and newspaper articles.
2. Use economic analysis to identify possible implications for the professional economic environment.
3. Effectively communicate in presentation and writing.
4. Critically examine the assumptions, models, and concepts underlying relevant economic theories and empirical works.

## Recent Improvements

The School is committed to continual improvement in teaching and learning and takes into consideration student feedback from many sources. These sources include direct student feedback to tutors and lecturers, feedback through Student Services and the Faculty Central, and responses to the Subject Evaluation Surveys. This information is also used to inform comprehensive reviews of subjects and courses.

## Attendance Requirements

It is the responsibility of students to attend all lectures/tutorials/labs/seminars/practical work for subjects for which you are enrolled.

Satisfactory attendance is deemed by the University at approximately 80% of the allocated contact hours.

## Using Generative Artificial Intelligence (GenAI)

GenAI technology (such as ChatGPT or Microsoft Co-pilot) is reshaping the University experience worldwide. UOW is committed to embracing GenAI as a tool to enhance learning experiences and develop vital work-readiness skills. However, misuse or use of GenAI in assessments where prohibited constitutes academic misconduct (as specified by [University Policy](#)).

**It is important that students check if GenAI is permitted** for each assessment task and how it is to be used and acknowledged. Please read the [student guidance](#) available on how to use GenAI ethically and critically, equally recognising its capabilities and limitations. For example:

- 1. Generative AI is not a substitute for decision-making:** GenAI should complement, not replace, your critical thinking and decision-making skills.
- 2. Output quality depends on prompts:** The quality of GenAI outputs is influenced by prompting. Poorly constructed or unclear prompts may generate outputs that are incorrect.
- 3. Fact verification is essential:** GenAI outputs can be fabricated, presenting inaccurate information or contain harmful bias. Verify all GenAI outputs against reliable sources.
- 4. Protect data and copyright:** Many GenAI technologies collect information in ways that breach privacy and data protection provisions, particularly where the source material is confidential or subject to copyright. Please check the Terms and Conditions of GenAI technologies and if unsure, contact UOW [Copyright Guidance](#).
- 5. Transparency in use:** Where required, you must acknowledge GenAI use, including providing prompt histories and detailing how GenAI was utilised.
- 6. Thoughtful and appropriate application:** Be mindful of when and how to use GenAI tools. Assess its appropriateness for each use and refrain from use when not suitable.

If you have any questions, please contact your Subject Coordinator.

## Method of Presentation

The subject will be presented as a series of lectures and tutorials.

Students must be aware that they are responsible for their own learning. Students must prepare adequately for lectures and tutorials in order to properly digest the material presented in those forms. Students are expected to undertake private study in order to fully understand and integrate all the material covered in this unit.

## Lecture Schedule

| Week | Date                  | Topic | Topics Covered                                                                                        | Readings      |
|------|-----------------------|-------|-------------------------------------------------------------------------------------------------------|---------------|
| 1    | 1 <sup>st</sup> July  | 01    | Introduction to Asia Economies<br>Introduction to basic economic concepts and tools for data analysis |               |
| 2    | 8 <sup>th</sup> July  | 02    | Economic growth models                                                                                |               |
| 3    | 15 <sup>th</sup> July | 03    | Inward Orientation as a Development Strategy                                                          | Chapter 1     |
| 4    | 16 <sup>th</sup> July | 04    | Outward Orientation as an Alternative Strategy                                                        | Chapter 2     |
| 5    | 21 <sup>st</sup> July | 05    | Foreign Direct Investment (FDI)                                                                       | Chapter 1,2   |
| 6    | 27 <sup>th</sup> July | 06    | The first wave in Asia: Japan and the Asian Tigers                                                    | Chapter 5 & 6 |
| 7    | 29 <sup>th</sup> July | 07    | New Trade Practise and Order: Global value chain and its implications                                 | Chapter 3     |
| 8    | 5 <sup>th</sup> Aug   | 08    | Rise of the giants: China vs India                                                                    | Chapter 8     |
| 9    | 18 <sup>th</sup> Aug  | 09    | Challenges of growth and industrialisation in Asia                                                    |               |
| 10   | 20 <sup>th</sup> Aug  | 10    | Future of growth and industrialisation in Asia                                                        |               |

## Subject Material

Any readings/references are recommended only and are not intended to be an exhaustive list. Students are encouraged to use the library catalogue and databases to locate additional readings.

## Textbooks

### Major Text(s)

## Assessment

This subject has the following assessment components.

### Assessment Summary

| Assessment Item | Form of Assessment           | Lecture Topic(s) | %           |
|-----------------|------------------------------|------------------|-------------|
| Assessment 1    | Individual Online Assessment | 1- 10            | 20%         |
| Assessment 2    | Group Assignment             | 1 - 10           | 30%         |
| Assessment 3    | Final Exam                   | 1 - 10           | 50%         |
|                 | <b>TOTAL MARKS</b>           |                  | <b>100%</b> |

### Assessment 1: Online Quiz and Assessment

|                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## **Notes on Assessment**

All assignments are expected to be completed independently. Plagiarism may result in a FAIL grade being recorded for that assignment.

## **Method of Submission of Assessment Items**

Assignments are to be submitted via Moodle.

## **Arrangement for acknowledging submission of written work**

Acknowledgement of submission will occur electronically through Moodle.

## **Procedure for the return of assessment items**

Assignments are scheduled to be marked in the computer lab. Your assignment must be submitted first to Moodle before being marked by the tutor. You may be asked questions about your code in the lab. Your marks will be deducted if you could not answer the questions presented by the tutor. While marking your assignment, the tutor will give you feedback.

## **Procedure for the retention of assessed work**

The University may retain copies of student work in order to facilitate quality assurance of assessment processes, in support of the continuous improvement of assessment design, assessment marking and for the review of the subject. The University retains records of students' academic work in accordance with the University Records Management Policy and the State Records Act 1988 and uses these records in accordance with the University Privacy Policy and the Privacy and Personal Information Protection Act 1998.

## **Assessment General**

Submission of assessment items via email will not be accepted.

## **Student contributions to tutorial and/or seminars**

Not applicable.

## **Assessment task is set up to be checked by Turnitin**

This subject does not use Turnitin.

## **Assessment Quality Cycle**

The University of Wollongong is committed to the quality assurance and quality enhancement of assessment. The University will meet its legislative and regulatory obligations, to ensure consistent and appropriate assessment through course management and coordination, including assessment quality assurance procedures. An Assessment Quality Cycle is used to describe quality assurance at the points of assessment design, assessment delivery, the declaration of marks and grades, and review and improvement activities.

## Referencing System

The type of referencing system to be used for written work is as follows:

- the Author-Date (Harvard) referencing system is the University's default referencing system to be used in the absence of a documented faculty/school preferred referencing style. Refer to the Library Referencing and Citing link:  
<https://www.uow.edu.au/student/learningcoop/referencingciting/index.html>

## Internet Resources

There are no restrictions on using Internet resources.

## Technical Fail

To be eligible to pass this subject, students must complete all assigned assessment tasks.

In addition, students must meet the following performance criteria:

- Achieve an overall cumulative mark of 50% or higher across all class assessments, and
- Obtain a minimum score of 50% in the final examination.

### Technical Fail (TF) Policy

If a student achieves an overall aggregate mark of 50% or greater but fails to meet a mandatory hurdle requirement (such as failing to secure 50% on the final exam or omitting an assessment task), a Technical Fail (TF) grade will be awarded.

- Failure of the subject.
- a TF without a mark will be granted.
- a TF will be presented on the student's academic transcript.
- The allocated mark of 49 will be used as the WAM calculation for subjects at all levels.

## Penalties for late submission of assessment items

Penalties apply to all late work, except if student academic consideration has been granted. Late submissions will attract a penalty of 5% of the assessment mark. This amount is per day including public holidays and weekends. Work more than 4 days late will be awarded a mark of zero.

## UOW Grade Descriptors

| GRADE                           | DESCRIPTOR                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Plagiarism - University's Academic Integrity Policy

The University's policy on acknowledgement practice and plagiarism provides detailed information about how to acknowledge the work of others: <http://www.uow.edu.au/about/policy/UOW058648.html>

The University's Academic Integrity Policy, Faculty Handbooks and subject guides clearly set out the University's expectation that students submit only their own original work for assessment and avoid plagiarising the work of others or cheating. Re-using any of your own work (either in part or in full) which you have submitted previously for assessment is not permitted without appropriate acknowledgement or without the explicit permission of the Subject Coordinator. Plagiarism can be detected and has led to students being expelled from the University.

The use by students of any website that provides access to essays or other assessment items (sometimes marketed as ‘resources’), is extremely unwise. Students who provide an assessment item (or provide access to an assessment item) to others, either directly or indirectly (for example by uploading an assessment item to a website) are considered by the University to be intentionally or recklessly helping other students to cheat. Uploading an assessment task, subject outline or other course materials without express permission of the university is considered academic misconduct and students place themselves at risk of being expelled from the University.

**When you submit an assessment task, you are declaring the following**

1. It is your own work, and you did not collaborate with or copy from others.
2. You have read and understand your responsibilities under the University of Wollongong's Academic Integrity Policy on plagiarism.
3. You have not plagiarised from published work (including the internet). Where you have used the work from others, you have referenced it in the text and provided a reference list at the end to the assignment.

Students must remember that:

- Plagiarism will not be tolerated.
- Students are responsible for submitting original work for assessment, without plagiarising or cheating, abiding by the University's Academic Integrity Policy as set out in the University Handbook, the University's online Policy Directory and in Faculty handbooks and subject guides.

**Student Academic Complaints Policy (Coursework or Higher Degree Research)**

In accordance with the Coursework Student Academic Complaints Policy, a student may request an explanation of a mark for an assessment task or a final grade for a subject consistent with the student's

right to appropriate and useful feedback on their performance in an assessment task. Refer to the Coursework Student Academic Complaints Policy for further information

<http://www.uow.edu.au/about/policy/UOW058653.html>

### **General Advice**

This outline should be considered in conjunction with policy documents available through the University of Wollongong website. Those policies are subject to revision.

Please see the additional documentation provided with this subject outline.
